

BOM St. Attractas Junior NS, Roll No. 19537b

Revised Risk Assessments to minimise the risk of being exposed to Covid-19

September 2021

The process involved consultation with all school staff.

Methodology used for hazard identification and control

In line with the requirements of Safety, Health and Welfare at Work Act 2005 (section 19) it is the policy of the BoM in St Attractas JNS to address significant hazards and risks in the workplace, to assess the risks to safety, health and welfare and to control these risks as far as is reasonably practicable.

The Board is committed to the ongoing identification of hazards, the assessment of the appropriate risks and the introduction of controls to deal with them. In addition, staff are involved and participate in safety, health and welfare issues within the school and are encouraged to identify and report any potential hazards that may exist and to ensure that a risk assessment is carried out.

This revised Risk Assessment includes all relevant updates and necessary control measures to minimise the risk of staff and others being exposed to Covid-19 and these will be incorporated into the Safety Statement for St. Projects in line with requirements of section 20 of the 2005 Act.

It is envisaged that additional reviews will be undertaken on a regular basis and in line with Government and public health advice to ensure that all information remains accurate, that controls are appropriate and where necessary risks are reassessed.

A **hazard** is anything with the potential to cause harm to the safety, health or welfare of staff, students, visitors and contractors – a wet or slippery floor, an unguarded machine, stressful work, a blocked entrance, hazardous chemicals etc. Hazards may be classified as physical, chemical, biological, environmental or human.

A **risk** is the likelihood that someone will be harmed by a hazard and the severity of that harm.

Control measures:

A control measure is an applied measure that reduces the level of risk. Control measures can be applied at the planning stage, can comprise physical measures, can be management issues and can include training. Good control measures will require a combination of some or all of these.

Control measure principles:

Schedule 3 of the Safety, Health and Welfare at Work Act 2005 lists the Principles of Prevention and the Board of Management undertakes to apply these principles (where practicable) in dealing with all risks within the school:

- Avoidance of risks
- Evaluation of unavoidable risks
- Combating of risks at source
- Adaptation of work to the individual
- Adaptation of workplace to technical progress
- Replacement of dangerous articles, substances or systems of work by safe or less dangerous articles, substances or systems of work
- Priority to collective protective measures over individual protective measures
- Development of an adequate prevention policy which takes account of technology, organisation of work, working conditions, social factors and the influence of factors relating to the working environment
- Appropriate training and instructions to employees.

When the safety audit identifies hazards, it is necessary to evaluate and rank them so that they can be controlled in an orderly way. The risk of a hazard is a measure of the likelihood or probability of an accident coupled with the severity of the injury or loss. The risk potential of each hazard was assessed (by ranking) by giving numerical values of between 1 and 5 to both the **severity** of the consequences and the **probability** of the event occurring. When the severity numerical factor and the probability numerical factor were multiplied together, they produced a number between 1 and 25 thereby producing the numerical values outlined in **risk rating** chart below.

Severity x Probability = Risk Rating

Severity

Severity Rating	Interpretation	Numerical Value
Fatality or Catastrophic	Single or multiple fatalities, widespread illness, large scale property or equipment damage	5
Major	Serious injury or illness, significant property or equipment damage	4
Moderate	Injury and damage to property	3
Minor	Minor injury or illness, minor property or equipment damage	2
Trivial	No significant injury or illness, no significant property or equipment damage	1

Probability/Likelihood

Probability Rating	Interpretation	Numerical Value
Inevitable	Likely to occur either immediately or in the short term	5
Very Likely	Could occur in time or if repeated enough	4
Likely	Likely to occur	3
Unlikely	Though unlikely, may occur over time	2
Rare	Unlikely to occur at all	1

Risk Rating

Numerical Value Severity x Probability	Descriptive risk rating	Interpretation
16 – 25	<p style="text-align: center;">Emergency – Extremely serious</p> <p>If an incident were to occur, it would be likely that a permanent, debilitating injury or death would result</p>	<p>Risks are unacceptable and immediate action required justifying special maintenance. Activity should be halted and stopped until the hazard is eliminated or appropriate risk controls are put in place.</p>
11 – 15	<p style="text-align: center;">Severe and Serious</p> <p>If an incident were to occur, it would be likely that an injury requiring medical treatment would result.</p>	<p>Activity can proceed but substantial efforts should be made to reduce the risk. Risk reduction measures should be implemented urgently within a defined time period and it might be necessary to consider suspending or restricting the activity or to apply interim control measures until this has been completed.</p>
6 – 10	<p style="text-align: center;">Medium</p> <p>If an incident were to occur, there would be some chance that an injury requiring First Aid treatment would result</p>	<p>Activity can proceed but consideration should be given as to whether the risks can be lowered. Control measures must be monitored and reviewed as required to ensure they remain suitable and sufficient.</p>
1 – 5	<p style="text-align: center;">Trivial or Negligible</p> <p>If an incident were to occur, there would be little likelihood that an injury would result</p>	<p>No additional controls are necessary as these risks are considered acceptable. Activity should be regularly reviewed to ensure there is no change to the risk rating and that controls are maintained.</p>

***Note:** A numerical rating has been used in column 4 of the risk assessment sheets to describe the risk potential for the hazard identified This method has been used in an attempt to ensure that the levels of risk will be understood and clear to all those operating within the school.

Covid- 19 Policy Statement- 20th September 2021

St Attractas JNS is committed to providing a safe and healthy workplace for all our staff and students. To ensure that, the Board of Management have developed a Covid-19 Response Plan and updated the Safety Statement for the school. All staff and pupils are responsible for the implementation of the response plan and a combined effort will help contain the spread of the virus. The Board of Management will:

- continue to monitor our Covid-19 response and amend this plan in consultation with our staff, pupils and parents/guardians
- provide up to date information to our staff, pupils and parents/guardians on the Public Health advice issued by the HSE and Gov.ie
- display information on the signs and symptoms of Covid-19 and correct hand-washing techniques
- provide an adequate number of trained Worker Representative(s) who are easily identifiable and put in place a reporting system
- inform all staff and pupils of essential hygiene and respiratory etiquette and physical distancing requirements
- adapt the school to facilitate physical distancing as appropriate in line with guidance of the Department of Education and Skills
- keep a log of contact of staff and pupil engagement to help with contact tracing
- ensure staff and pupils engage with the online induction/familiarisation briefing provided by the Department of Education and Skills
- implement the agreed procedures to be followed in the event of someone showing symptoms of Covid-19 while at school
- provide instructions for staff and pupils to follow if they develop signs and symptoms of Covid-19 during school time in line with the procedures provided by the Department of Education and Skills
- implement cleaning in line with government advice and agreed checklists

All staff, pupils and parents/guardians will be consulted on an ongoing basis and feedback is encouraged on any concerns, issues or suggestions.

Who may be affected?	Identified Risks	Risk Communication, Education and Training	Risk Rating with controls	Action implementation
		Controls		
Staff	<p>Spread of Covid-19 virus</p> <p>Persons currently deemed most at risk of complications if they catch the coronavirus are:</p> <ul style="list-style-type: none"> • 60 years of age and over • have long-term medical conditions – i.e. heart disease, lung disease, high blood pressure, diabetes or cancer • pregnant women <p>Known effects of the coronavirus:</p> <ul style="list-style-type: none"> • A fever (high temperature of 37.5 degrees Celsius or above) • A cough - this can be any kind of cough, not just a dry cough • Shortness of breath or breathing difficulties • Loss of sense of smell • Loss of sense of taste or distortion of sense of taste • Death 	<p>The Board of Management will develop a response plan for the prevention and mitigation of Covid-19 following a risk assessment of the school facility. This plan will highlight the measures necessary to protect the health and safety of staff in re-opening and modifying the work arrangements within the school.</p> <p>The staff representative(s) will be properly consulted when developing and implementing the action plan for the prevention and mitigation of Covid-19 within the school and all staff will be informed about the measures being introduced, using specific risk communication and staff engagement approaches.</p> <p>The Board of Management will:</p> <ul style="list-style-type: none"> ✓ Ensure that all staff have returned a Return to Work Declaration form before Friday 27th August 2021 ✓ Ensure that all staff receive necessary training prior to returning to work https://www.gov.ie/en/publication/dd7fb-induction-training-for-reopening-schools/ ✓ Provide posters, information and electronic message boards to increase awareness of Covid-19 among staff and pupils ✓ Advise staff and pupils to self-isolate or restrict their movements at home if they display any signs or symptoms of Covid 19 and contact their family doctor to arrange a test ✓ Advise staff and pupils not to return to or attend school in the event of the following: 	Low	<p>Board of Management Principal Staff</p> <p>Staff Training Provided both online and face to face</p>

- If they have been identified by the HSE as a close contact of a confirmed case of Covid 19 (unless they are they are fully vaccinated and symptoms free)
- If they live with someone with the virus (unless they are they are fully vaccinated and symptoms free)

- If they have travelled outside of Ireland-in such instances staff and parent of pupils are advised to consult and follow latest Government advice in relation to foreign travel
- Advise staff and parent of pupils to cooperate and follow any public health advice in the event of a case or outbreak in the school

- ✓ Promote safe individual practices within the school campus
- ✓ Engage with staff in providing feedback on the preventive measures and their effectiveness
- ✓ Provide regular information about the risk of Covid-19 using official sources, such as government agencies (HSE, HSA, etc.) and the World Health Organization
- ✓ Emphasise the effectiveness of adopting protective measures especially good personal hygiene
- ✓ Provide specific training in the proper use of PPE for staff, where required
- ✓ Inform staff who fall into the high risk category of DES arrangements to avail of Leave as per Circular 0042/2021

Risk Level Calculation

- (a) Severity of risk/injury 1=trivial, 2=slight, 3=moderate, 4=major, 5=fatality
 (b) Likelihood of event 1=rare, 2=unlikely, 3=likely, 4=very likely, 5=inevitable
 (c) Risk Rating = (a) X (b)

Risk Level Action

- 1-5 Trivial risk Acceptable
 6-10 Medium risk Requires monitoring
 11-15 Severe risk Requires immediate further action and control
 16-25 Emergency risk Halt activity and review immediately
